Excerpt: .the following significant, though rather lengthy statement: It appears that this corn is winter-shelled corn, and any one who has had experience knows that winter-shelled corn can not be carried into July safely. In my own experience, which has covered 40 years of handling corn, I have seen this proven more, than once, indeed I have had 2 year old corn get out of order. Corn loses moisture in the cribs, and if shelled during the summer time when there is a long dry spell it will then carry indefinitely without trouble, but not so if shelled in the winter. Experience has proven many times that corn apparently sweet and in good condition to-day will smell a little sour the next day. In other words, there comes a time when it makes the turn from sweet corn to sour, and does this in the course of a few hours. The Government has now perfected a means for testing the acidity in corn and can determine a week or more in advance of the time it will be sour enough to be detected, and it is asserted that in the near future the acidity test will be a prominent feature in grading corn. I refer to it only to indicate that because corn was No. 2 when all the more modern elevators now have highly developed methods of guarding against an increase in the temperature of grain in the bin, which is the best guaranty against...
