MULTIVARIATE BIRKHOFF INTERPOLATION

Springer Okt 1992, 1992. Taschenbuch. Book Condition: Neu. 235x155x11 mm. This item is printed on demand - Print on Demand Titel. - The subject of this book is Lagrange, Hermite and Birkhoff (lacunary Hermite) interpolation by multivariate algebraic polynomials. It unifies and extends a new algorithmic approach to this subject which was introduced and developed by G.G. Lorentz and the author. One particularly interesting feature of this algorithmic approach is that it obviates the necessity of finding a formula for...

Reviews

A must buy book if you need to adding benefit. It is actually writer in basic phrases and never difficult to understand. I found out this book from my dad and i advised this publication to find out.
