By Kenneth L Calvert, Michael J Donahoo

ELSEVIER SCIENCE TECHNOLOGY, United States, 2008.

Paperback. Book Condition: New. 2nd Revised edition. 231 x 190

mm. Language: English . Brand New Book. The networking

capabilities of the Java platform have been extended

considerably since the first edition of the book. This new edition

covers version 1.5-1.7, the most current iterations, as well as

making the following improvements: The API (application

programming interface) reference sections in each chapter,

which describe the relevant parts of each class, have been

replaced with: a summary section that lists the classes and

methods used in the code; and, a gotchas section that mentions

nonobvious or poorly-documented aspects of the objects. In

addition, the book covers several new classes and capabilities

introduced in the last few revisions of the Java platform. New

abstractions to be covered include NetworkInterface,

InterfaceAddress, Inet4/6Address,

SocketAddress/InetSocketAddress, Executor, and others;

extended access to low-level network information; support for

IPv6; more complete access to socket options; and, scalable I/O.

The example code is also modified to take advantage of new

language features such as annotations, enumerations, as well as

generics and implicit iterators where appropriate. Most Internet

applications use sockets to implement network communication

protocols. This book s focused, tutorial-based approach helps

the...
